DIAGNOSTICS

	Ensure text remains visible during webfont load	~
A	Reduce the impact of third-party code — Third-party code blocked the main thread for 880 ms	~
A	Some third-party resources can be lazy loaded with a facade — 1 facade alternative available	~
A	Does not use passive listeners to improve scrolling performance	~
A	Avoid document.write()	~
A	Image elements do not have explicit width and height	~
A	Serve static assets with an efficient cache policy — 29 resources found	~
A	Minimize main-thread work — 5.7 s	~
A	Avoid enormous network payloads — Total size was 4,228 KiB	~
	Reduce JavaScript execution time — 3.5 s	~
	Avoid an excessive DOM size — 1,297 elements	~
	Reduce unused JavaScript — Potential savings of 1,184 KiB	~
	Eliminate render-blocking resources — Potential savings of 340 ms	~
0	Avoid chaining critical requests — 54 chains found	~
0	User Timing marks and measures — 93 user timings	~
0	Largest Contentful Paint element — 1,540 ms	~
0	Avoid large layout shifts — 5 elements found	~
0	Avoid long main-thread tasks — 14 long tasks found	~
0	Avoid non-composited animations — 1 animated element found	~

PASSED AUDITS (18) Show

Accessibility

These checks highlight opportunities to improve the accessibility of your web app. Automatic detection can only detect a subset of issues and does not guarantee the accessibility of your web app, so manual testing is also encouraged.

NAMES AND LABELS

▲ Image elements do not have [alt] attributes

✓ (frame) or (iframe) elements do not have a title

✓ Elements with visible text labels do not have matching accessible names.

✓ Links do not have a discernible name

These are opportunities to improve the semantics of the controls in your application. This may enhance the experience for users of assistive technology, like a screen reader.

CONTRAST

▲ Background and foreground colors do not have a sufficient contrast ratio. ∨

These are opportunities to improve the legibility of your content.

NAVIGATION

▲ Heading elements are not in a sequentially-descending order	~
These are opportunities to improve keyboard navigation in your application. ADDITIONAL ITEMS TO MANUALLY CHECK (10)	Show
These items address areas which an automated testing tool cannot cover. Learn more in our guide on conducting an accessibility review.
